This is only for builds earlier than 214 on Vista Box.

In cases wherein the autorun.exe will not execute the setup.exe when Movielearn disc is inserted in DVD drive for the first time, please do the following:

First time installation:

1. Insert Movielearn disc. Do not execute any items in AutoPlay dialog. Simply close it or select "Open folder to view files" if present.
2. Just browse the CD and double-click the setup.exe manually. Installation of files should start immediately.

Next time insertion of Movielearn disc:

1. Just choose the (MVL Logo) Play DVD Movie (using Movielearn Application) from the Vista AutoPlay dialog box. You are now ready to start Movielearn.
